Artificial Intelligence (AI)

AI can be used to strip your child's face / body and transform it into CSAM (Child Sexual Abuse material)

Face recognition with GPS coordinates can be used to track / follow your child, and locate them later as they grow to threaten, sextort, and expose these photos or videos or force them into sex trafficking.

Florida Faith Alliance recommends to all parents that they never post photos or videos to the public, only privately. Turn off location settings and never post your child in a school uniform to disclose where they attend school.

A Jensen Beach man was arrested in 2024 for taking photos of neighborhood children and using AI to create CSAM world-wide. Teach your children to not let others take their photos.

Group photos are ok if they don't show face details.

Virtual Reality (From Culturereframed.com)

The inappropriate use of these innovative technologies is attracting new customers and new dollars to the pornography market, which now is estimated to generate more than \$19 billion annually. The far-reaching effects of these technologies — on individuals and society as a whole — are outlined in a new research report from Culture Reframed, [“Artificial Intelligence, Virtual Reality, and Pornography: How Misogyny Constrains the Future.”](#)

By making virtual sex the new reality of pornography, AI and VR are contributing to the industry's growth in popularity and profits in numerous ways. AI allows users to fabricate sexual photos and videos, humiliate women through undressing or “nudifying” apps, and create sexbots, or “virtual girlfriends.” VR users can use their computer or three-dimensional headsets to interact with virtual fantasy worlds, where sexual harassment and virtual sexual assault are common.
